

# Food Paper

(Butchery paper / Bakery crepe paper)

**Butchery paper** is used for packing and swabbing of meat or as an underlay for meat products. Due to its pure quality, meat is prevented from drying out whilst stored in a refrigerator or in cold storage chambers. Butchery paper is available in white sheeting with a paper weight from 45 g/m<sup>2</sup> to 80 g/m<sup>2</sup>, in a variety of different sizes.

**Bakery crepe paper** is used in many bakeries for the absorption of cooking oil from deep-fried pastry such as berliners, crullers or doughnuts. It is also used as an underlay to present pastries and bakery products in merchandising displays. Bakery crepe paper is available in white paper with a paper weight from 70 g/m<sup>2</sup> and 100 g/m<sup>2</sup>, in sheets with size 51 cm x 65 cm.

Food paper is pure-grade paper, made at the company's paper-mill at Netstal, in Switzerland, free from all environmental pollutants. All our white paper is made from ECF or TCF-bleached pulp; all pulp is supplied from certified, sustainable forestry operations. Only wood-free virgin pulp is used for our paper without any recycled content; it is also tear-resistant when wet and absorbent. Food paper conforms to all food legislation (EG 1935/2004, LFGB, BfR XXXVI) and to the requirements of the U.S. Food and Drug Administration (FDA). The resultant base paper is regularly tested by an independent laboratory, ISEGA, to whose safety standards it conforms. The quality of our food paper products is subject to defined and regularly monitored standards conforming to DIN EN ISO 9001. Food paper is available also on reels.

## Standard specifications for butchery paper:

Size	Quality	Packaging Option
